PREFACE

This publication presents information relating to milk supply areas for handlers regulated under Federal milk marketing orders, which are authorized by the Agricultural Marketing Agreement Act of 1937.

In contrast to the marketing areas where the regulated handlers distribute milk to the public, and which are specifically defined by the Federal orders, the milk production areas are not specified by the orders.

This publication presents a breakdown of producer deliveries of milk to Federal order markets according to the State and counties from which these deliveries originated. It is hoped that such a breakdown of deliveries will provide a meaningful picture of the milk supply area of Federal order markets.

Table 1 shows the annual volume of milk delivered to Federal order plants by State of origin, and the percentage that such deliveries are of fluid grade milk and all milk sold to plants and dealers within each State.

Table 2 lists the Federal milk marketing areas in alphabetical order and shows the annual volume of milk delivered to each market from each State and the percentage that each State represents of the total volume of milk delivered to each market.

Table 3 lists the States by geographic location and shows for each county in the State the volume of milk delivered to Federal order areas, as well as the total for each market, for the month of December. While the geographic order of the States makes it possible to show the data for most markets on the same or consecutive pages, the data for some markets are several pages apart.

Table 4 shows for regional groups of markets the annual volume of milk delivered to each region from each State and the percentage that each State represents of the total volume of milk delivered to the markets in each region.

* * * * * * * * * *

Similar data for 1957, 1960, 1963, 1965, 1967, 1969, 1972, and 1973 were issued in the following publications, respectively; AMS-243 (1958), an unnumbered Agricultural Stabilization and Conservation Service (ASCS) publication (1961), AMS-243 (1964), C&MS-50 (1966), C&MS-50 (1968), C&MS-50 (1969), an unnumbered Agricultural Marketing Service (AMS) publication (1974), and AMS-565 (1975).

Issued April 1976

HISTORICAL SUMMARY

A number of publications have been issued which reported on various aspects of the milk supply areas of Federal milk order markets. The following tables summarize this information for selected years, 1957-1974. These data are one measure of the increasing importance of the Federal milk order program to the dairy industry, particularly the fluid milk sector, and illustrate the growth of the milk order program.

Year	Number of markets	Number of producers in Federal milk marketing areas 1/	Deliveries to Federal orders			All milk sold to plants and dealers in the U.S. 2/
			Total	Percentage of All milk	Percentage of Fluid grade	
	Number	Number	Mil. lb.	Percent		Mil. lb.
1957	68	182,551	33,455	34	53	98,284
1960	80	189,816	44,812	43	64	103,927
1963	82	176,477	52,860	48	70	111,195
1965	73	158,077	54,444	48	70	112,716
1967	74	140,657	53,761	49	71	109,420
1969	67	144,275	61,026	56	77	108,653
1971	62	141,347	67,872	60	80	112,201
1972	61	136,533	68,568	60	78	113,990
1973	61	131,565	66,229	60	78	109,823
1974	61	126,919	67,815	62	79	109,963

Year	Number of markets	Population of Federal milk marketing areas 3/	Number of States delivering to Federal order markets 4/	Percent of markets receiving producer receipts from 4/ Number of states: 1	2 to 4	5 to 7	8 or more
	Number	1,000	Number	Percent			
1957	68	57,297	44	19	75	4	2
1960	80	88,818	46	19	72	9	0
1963	82	100,083	45	17	70	13	0
1965	73	102,351	45	15	69	16	0
1967	74	103,566	46	18	67	12	3
1969	67	122,319	47	18	57	21	4
1971	62	142,934	48	15	47	35	3
1972	61	142,132	48	13	49	28	10
1973	61	141,472	48	10	55	29	6
1974	61	141,546	48	8	57	27	8

1/ Average for year.
2/ "Milk Production, Disposition, and Income," SRS.
3/ End of year; 1957, 1960-69, and 1971-74, according to 1950,1960, and 1970 U.S. census, respectively.
4/ Prior to 1972, yearly deliveries by a State are based on the relationship of deliveries in 1 month.

During 1974, handlers subject to 61 Federal milk marketing orders received 67.8 billion pounds of milk from producers, 62 percent of all milk marketed in the United States and 79 percent of the milk of bottling quality sold to plants and dealers in the United States. In comparision, Federal order milk deliveries in 68 markets during 1957 amounted to 33.5 billion pounds, 34 percent of all milk marketed in the United States and slightly more than half of all fluid grade marketings. The growth of the Federal order program has resulted mainly from the expansion of existing orders into new previously unregulated areas and the addition of new orders. Also contributing to the growth in recent years has been the increasing conversion of manufacturing grade to fluid (Grade A) production and this production becoming associated with Federal orders.

The expansion of the Federal order program has been accompanied by an expansion in the supply area. In 1957, 68 Federal order markets received milk from 44 States. By 1974, 61 Federal order markets were receiving milk from producers in 2,180 counties in the 48 contiguous States. A corollary trend to the expansion in the supply area of all Federal order markets is a general extension in the supply areas of individual markets. In 1957, 94 percent of the effective order markets received milk from fewer than five States—usually the State or States in which the market was located plus neighboring States. By 1974, the percentage of markets receiving milk from five or more States increased to 35 percent with 8 percent of the markets receiving milk from eight or more States.

A closer look at total marketings and deliveries to Federal orders by producers in the leading milk producing States provides further insight into the changing milk supply patterns for Federal order markets. These States are ranked in two ways: Rank I, according to deliveries to Federal orders; and Rank II, according to total milk marketed in the United States.

The following table shows the leading States delivering to Federal orders; deliveries to Federal orders as a percentage of total deliveries to Federal orders; and relationship to total United States marketings 1960, 1967, and 1974.

State	1960			1967			1974

Total Top 10		69.9			66.2			64.9	

Generally, the States with the largest milk production are also the States that delivered the most milk to Federal order markets. An exception is California in which there are no Federal milk orders. Over the period 1960-1974, the order of the top 10 States delivering milk to Federal orders has changed. Notably, Minnesota has jumped from 17th to 6th. Two States that were in the top 10 in 1960, Vermont and Maryland, are no longer in this group.

HIGHLIGHTS

During 1974, nearly 127,000 producers in the 48 contiguous States delivered 67.8 billion pounds of milk to handlers subject to 61 Federal milk marketing orders. The value of this milk delivered to Federal order plants at order blend prices totaled more than 5.7 billion dollars.

Some highlights of the 1974 survey of sources of milk in Federal order markets were:

(1) Producers in 25 States marketed under Federal milk orders more than 75 percent of all the milk sold to plants and dealers in those States. There were 28 States whose producers delivered more than 90 percent of their fluid grade marketings to Federal milk order plants. See table 1.

(2) New England, Middle Atlantic, and West South Central producers marketed under Federal milk orders the highest percentage (87 percent) of all the milk sold to plants and dealers in those regions. Producers in the West North Central region delivered the highest percentage (99 percent) of their fluid grade milk marketings to Federal order plants. As might be expected, producers in the Pacific region delivered the lowest percentages of their fluid grade and all milk marketings (24 and 22 percent, respectively) to Federal order plants. (This is due to the absence of any Federal milk orders in California, the second largest milk producing State in the country in 1974.) See table 1.

(3) Eleven Federal order markets received all of their producer milk and 29 other markets received more than 90 percent of their producer milk from the State or States in which their marketing areas are located. By the way of contrast, the Connecticut and Southern Illinois markets received only 37 and 40 percent, respectively, of their producer milk from the State in which their marketing areas are situated. See table 2.

(4) In each of five markets, Federal order handlers received all of their producer milk from dairy farmers in one State. Fourteen other markets had two States as their sources of producer milk. In comparison, the Eastern Colorado and Memphis markets obtained their milk supplies from producers located in 11 and 10 States, respectively; the Eastern Ohio-Western Pennsylvania, Ohio Valley, and South Texas markets received milk from 8 States; and, 7 other markets were supplied milk by dairy farmers from 7 states. See table 2.

(5) Iowa and Minnesota producers each delivered milk to 16 Federal order markets. Producers in Texas and Wisconsin supplied 15 Federal order markets, and producers in Oklahoma and Kansas shipped milk to 13 and 12 markets, respectively.

(6) In December 1974, producers in 2,180 of the 3,108 counties in 48 contiguous States delivered milk to Federal order markets. Clayton and Dubuque Counties, Iowa and Wabasha and Winona Counties, Minnesota each had producers delivering milk to nine Federal order markets. The producers in two counties in Iowa, two

counties in Minnesota, and three counties in Texas shipped milk to 7 markets. There were nine other counties whose dairy farmers supplied milk to 6 Federal order markets. See table 3.

(7) In December 1974, five counties had producers delivering more than 35 million pounds of milk to Federal order markets. Ranked according to size, these counties were: Lancaster County, Pennsylvania, 67.5 million pounds; Maricopa County, Arizona, 51.6 million pounds; Dane County, Wisconsin, 46.7 million pounds; Dodge County, Wisconsin, 39.5 million pounds; and Hopkins County, Texas, 37.9 million pounds. There were 7 other counties whose dairy farmers shipped more than 30 million pounds to Federal order markets. See table 3.

(8) There were 76 counties which each delivered more than 15 million pounds of milk to Federal order markets in December 1974. Although these 76 counties represent only 3.5 percent of the 2,180 counties delivering to Federal order markets, they accounted for 1.8 billion pounds of milk or 32.1 percent of the total deliveries to Federal order markets in December 1974.

(9) During the 2-year period from 1972 to 1974, the East South Central region experienced the largest change in the relative position of the States which supplied the Federal milk orders located in that region. In 1972, Mississippi producers marketed 29.51 percent of the total milk marketed in the region. Tennessee and Kentucky producers shipped 55.21 and 10.45 percent, respectively. However, by 1974, Mississippi's share had dropped to 8.01 percent, while Tennessee's and Kentucky's shares increased to 70.21 and 15.34 percent. The basic reason for this shift is the termination of the Mississippi order on April 1, 1973. See table 4.

MILK MARKETING AREAS UNDER FEDERAL ORDERS AS OF JANUARY 1, 1974

1/ Revised data for 1973. Partially revised for 1974.
2/ Total deliveries of milk by producers in each State to handlers regulated under Federal milk orders. Deliveries by State are based on actual deliveries in each month of that year.
3/ Computed from data contained in "Milk Production, Disposition, and Income," 1973-74 and "Wisconsin Agricultural Statistics," 1975 issue #200-75. Note: The Federal order plants to which milk from a particular state is delivered are not necessarily located in that state.
4/ Percentage Federal order deliveries are of milk sold to plants and dealers that is eligible for fluid use ("Grade A" in most States).
5/ Not published to avoid disclosing individual operations for manufacturing grade milk.
6/ The Mississippi Federal milk order, under which was marketed the majority of the milk produced by Mississippi dairy farmers, was terminated midnight, April 30, 1973.

1/ Total deliveries of milk by producers in each State to handlers regulated under Federal milk orders.
2/ For some markets, deliveries by some States have been combined. The States are listed by decreasing proportions of deliveries to the markets. States in parenthesis delivered less than three million pounds to the market.
3/ The data for the Central Arkansas and Fort Smith markets have been combined in order to mask restricted data.

1/ Total deliveries of milk by producers in each State to handlers regulated under Federal milk orders, grouped into regions.

2/ States whose producers marketed milk under the Federal orders located in the region. Regional totals include receipts in new markets established during the period in the addition to changes in the individual markets due to the expansion, contraction, mergers or termination.

3/ Includes data for Nevada. The data for the two States were combined in order to mask restricted data.
